DESCRIPTION

Sharebot Kiwi-3D is the 3D printer made by Sharebot for those looking for the best quality at a reasonable price.

Sharebot Kiwi3D is a 3D printer derived from the Sharebot NG architecture. From its bigger sister, it takes the characteristics of solidity and professionalism, focusing these qualities in a smaller size 3D printer, adjusted for making every desk into a personal creative center.

Smaller dimensions and convenience make the Sharebot Kiwi3D the ultimate 3D printer for schools, students, young professionals and everyone wanting to enter the 3D printing world with a little, practical, smart and fast tool that is perfectly integrated in best tradition of Italian design and "Made in Italy" products.
